

Project Documentation

1. Project Description

This project is a Reminder Application developed in C# using the .NET MAUI framework. The purpose of the application is to help users manage reminders, potentially aimed at improving sleep habits (as suggested by the name 'CasNaSpanok', which means 'Time to Sleep').

The project structure includes:

- MainPage.xaml and AppShell.xaml: Define the UI and navigation.
- Reminder.cs: Contains data structures or logic for reminders.
- MauiProgram.cs: Configures services and app startup.
- Resources/ and Platforms/: Platform-specific resources and configurations.

2. Technologies Used

- C#
- .NET MAUI (Multi-platform App UI)
- XAML for UI design
- .NET SDK
- Standard .NET project structure with solution file (CasNaSpanok.sln)

3. Instructions for Running

Prerequisites:

- .NET SDK installed (e.g., .NET 6 or later, ideally .NET 7 for MAUI)
- Visual Studio 2022 or later with .NET MAUI workload installed

Steps:

1. Clone or extract the project to your local machine.
2. Open the solution file (CasNaSpanok.sln) in Visual Studio.
3. Select the target platform (e.g., Android Emulator, Windows Machine).
4. Build the solution:
dotnet build
5. Run the application:
dotnet run
6. The application should now launch on the chosen platform.
